1 Frequently asked questions

1. In the event of a power loss, several customers need to detect the absolute position once the power is restored. Additionally, some of them also require detecting the last absolute position before the power loss. Which ams OSRAM solutions (magnetic and inductive sensors) make this possible?

All our Magnetic position sensors offer absolute position information immediately after power is restored. Detecting last absolute position within 360 before power is restored won't be required.

2. It would be useful to receive a fighting guide against Melexis and Allegro regarding their magnetic position sensors (at least the high runners). The same applies to inductive position sensors.

Please refer to our Position Sensors fighting guide.

3. Are there any reference designs (for rotary and linear movements) and software tools for inductive position sensors?

Yes, please see here: [AS5715R](#)

Additionally, we also offer Coil Design guide in the form of script.

4. Are there any reference designs (for rotary and linear movements) and software tools for magnetic position sensors?
5. Does ams OSRAM offer ASIL D?

Yes, we offer ASIL D in dual die solution currently.

6. What should drive a customer to adopt an ams OSRAM magnetic solution?

Stray field immunity is the key driver for customers to adopt ams OSRAM magnetic solution. For details, please refer fighting guide

7. Is there a plan to develop magnetic solutions for 3D joysticks? If so, which ones?

We have magnetic sensors indeed fitting for 3D joystick applications. More details are explained as follows:

Figure 1: Joystick applications

2 Revision information

Definitions

Draft / Preliminary:
The draft / preliminary status of a document indicates that the content is still under internal review and subject to change without notice. ams-OSRAM AG does not give any warranties as to the accuracy or completeness of information included in a draft / preliminary version of a document and shall have no liability for the consequences of use of such information.

Changes from previous released version to current revision v1-01	Page
Document security class is updated to "PUBLIC" in the footer	
• Page and figure numbers for the previous version may differ from page and figure numbers in the current revision. • Correction of typographical errors is not explicitly mentioned.
